

## Distributed Ledger, Inc. Blockchain Infrastructure as a Service

Global Connectivity and cloud services in 100's of data centers around the world. Our Distributed Blockchain Infrastructure as a Service allows you to run your blockchain ecosystem on industry grade hardware perfect for any existing or future blockchain projects. We provide the user with private, scalable, secure, and low-latency infrastructure to facilitate all aspects of development and execution. The blockchain space is constantly evolving and we are staying ahead of the curve with everything we do to ensure our infrastructure does not get left behind.

### Eliminate the headaches

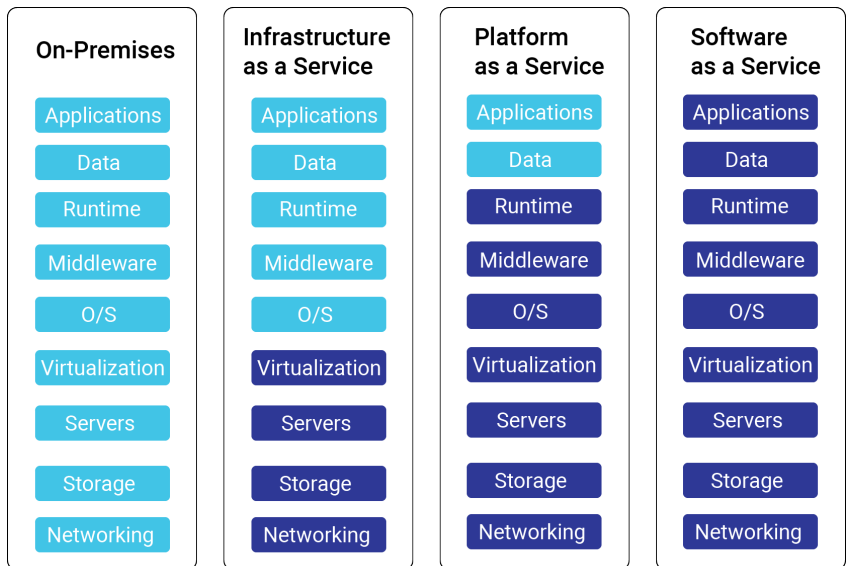

Implementing an appropriate Infrastructure as a Service plan takes most of the heavy lifting off of your hands. Our team is experienced in handling the key elements of your project's infrastructure to ensure high uptime and scalability at a fraction of the cost.

### Industries Served

Our DBIaaS supports a number of different industries including:

- Advertising
- Healthcare
- Banking
- Telecom
- And more

### Benefits of IaaS

You Manage
