

Distributed Ledger, Inc. Blockchain Platform as a Service

The platform your Enterprise Blockchain project is built on is the building block of your distributed systems. It's just as important as selecting the correct business model and the correct partners to make that business model work. With a platform that can scale in size and transactions per second, DLI's BPaaS offering can meet your needs now and in the future for all major Blockchain Enterprise projects. Through our joint-venture with [Ternio](#), we now provide clients with the opportunity to use Lexicon for their next project in addition to the resources that can work with any other blockchain.

What's Lexicon?

Lexicon is the name given to Ternio's blockchain platform forked from Hyperledger. Designed and built with speed in mind, Lexicon is poised to disrupt a number of industries with processing times that once seemed impossible. At **1,000 Transactions Per Second (TPS)**, the speed and scalability of Lexicon is perfect for your next project.

Why Blockchain Platform as a Service?

Having a team of trusted professionals is vital to a blockchain project's success over time. Our team provides professional services in a capacity that covers everything that goes into creating your own blockchain platform.

On-Premises	Infrastructure as a Service	Platform as a Service	Software as a Service
Applications	Applications	Applications	Applications
Data	Data	Data	Data
Runtime	Runtime	Runtime	Runtime
Middleware	Middleware	Middleware	Middleware
O/S	O/S	O/S	O/S
Virtualization	Virtualization	Virtualization	Virtualization
Servers	Servers	Servers	Servers
Storage	Storage	Storage	Storage
