

Distributed Ledger, Inc. Enterprise Services

Distributed Ledger, Inc. is a distributed ledger and blockchain technology company driven by solving the world's most complex problems. We know that by implementing this new peer to peer paradigm that we are changing the world by decentralizing outdated systems and, in the process empowering individuals in ways that were unheard of just a few years ago. Our purpose is to solve networking and database problems associated with trust, cost, data accuracy, transaction times, scalability, and security.

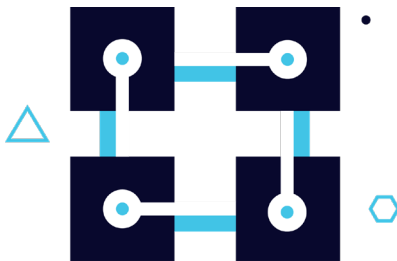

Distributed Blockchain Infrastructure as a Service

DLI's DBIaaS is private, scalable, secure, low latency infrastructure solution to facilitate all aspects of Enterprise Blockchain deployment and scalability. With Global connectivity and cloud services in 100's of datacenters world-wide, as well as direct connectivity and partnerships with IBM, Amazon, Azure, and the WaveFly Cloud, DLI will exceed all requirements to scale and grow your Enterprise Blockchain project.

Blockchain Platform as a Service

The platform your Enterprise Blockchain project is built on is the building block of your distributed system. The platform is just as important as selecting the correct business model and the correct partners to make that business model work. With a platform that can scale in size and transactions per second, DLI's BPaaS offering can meet the needs now and in the future for all major Blockchain Enterprise projects.

Consulting & Engineering Services

DLI is your trusted consultant. Under our consulting services agreement you will receive unbiased, objective information, direction, and quality assurance that will be the catalyst for your project's scale, growth and success.

It's our goal to change the world with innovative technology and pave the way for a fully decentralized ecosystem to positively impact our everyday lives.
